

GLACIER HDD 100

ULTRA HIGH-PERFORMANCE COOLANT WITH LOW SILICATE TECHNOLOGY

PRODUCT DESCRIPTION:

GLACIER HDD 100 is a long-life coolant concentrate formulated with mono ethylene glycol, designed for heavy-duty diesel engines and stationary engines. Free of amines and phosphates, it incorporates low-silicate technology to provide reliable protection against frost, overheating, corrosion, and cavitation in highly loaded engines. This advanced formulation ensures comprehensive protection for all metals within the cooling system, delivering optimal performance and durability.

APPLICATION:

GLACIER HDD 100 is a fully formulated coolant concentrate and must be diluted with water before application. Best concentration for the application is 50 vol% GLACIER HDD 100. It is recommended for use in Mining, Construction as well as on-highway applications.

FEATURES & BENEFITS:

- Outstanding corrosion protection
- Contains no amines, nitrites or phosphates
- Universal application at passenger cars and commercial vehicles.
- Anti-cavitation, preventing foam and the retention of air, ensuring the good performance of the pump.
- Prevents the build-up of deposits, keeping the cooling system clean.
- Long life service product
