

MOTOX AIR FILTER OIL

PRODUCT DESCRIPTION:

MOTOX AIR FILTER OIL is specifically formulated for use with "wet type" foam air filters in both four-stroke and two-stroke engines. This advanced oil utilizes a precise blend of high-quality base oils and additives to deliver exceptional performance by effectively trapping airborne dirt and abrasive particles, preventing them from entering the fuel intake system and combustion chamber.

APPLICATION:

MOTOX AIR FILTER OIL is designed for use in all oiled foam elements.

DIRECTIONS FOR USE:

NOTE: Wear solvent resistant gloves when using Air Filter Oil.

Ensure the foam filter is clean. To clean, wash a dirty filter in solvent (for example, kerosene or distillate) to remove oil and dirt. Squeeze out any remaining solvent carefully, taking care not to damage the foam element. Service the foam air filter regularly in accordance with the manufacturers' instruction, and particularly when the unit has been used in dusty, dirty operating environments.

NOTE: If the filter is washed with a degreaser and then with water, remove as much water as possible by shaking or squeezing between an absorbent material or leaving to dry, before applying Air Filter Oil.

Do not apply or mix Air Filter Oil with any other fluid to the wet type foam air filters otherwise the efficiency of the product will be impaired.

FEATURES & BENEFITS:

- Developed to ensure excellent performance for motorcycle filters.
- Tested in both controlled field conditions and bench test procedures according to BSI 1701 (ISO 511).
- High filtering efficiency for extended filter and engine life.
- Maintains air flow for instant engine response and maximum power output.

TYPICAL PROPERTIES:

PARAMETERS	ASTM	UNIT	MOTOX AIR FILTER OIL
Appearance	-	-	Blue Tacky Oil
Flash Point, °C	D92	°C	40
Density@15°C/ 60°F	D4052	g/cm3	TBR

DISCLAIMER: The test data presented above is indicative and not a strict specification, as it may vary within acceptable production tolerances. Internal reserves the right to update or modify this test data. For the most accurate and current information, please refer to the latest version of this Technical Data Sheet (TDS).

HEALTH & SAFETY, ENVIRONMENT:

Continuous or repeated exposure to oil may lead to skin problems. Avoid contact with the oil. In case of contact, wash thoroughly with soap and water. Do not dispose of used oil in drains or the environment. Dispose of it at an authorized used oil collection point. For additional safety information, please refer to the MSDS available on our website at www.internal.net.

PROTECT THE ENVIRONMENT:

Take used oil to an authorized collection point. Comply with local regulation. Do not discharge into drains, soil or water.
